EVIDENCE AND CONTROVERSY
IN PUBLIC HEALTH

CPHI 2012–2013 Seminar Series

When do we have enough evidence to act on the social determinants of health?

Paula Braveman, MD, MPH is Professor of Family and Community Medicine and Director of the Center on Social Disparities in Health at the University of California, San Francisco (UCSF). She received her M.D. degree and completed a residency in Family Medicine at UCSF, and received an MPH in epidemiology from University of California, Berkeley. For more than 25 years, Dr. Braveman has studied and published extensively on health equity and the social determinants of health, and has actively engaged in bringing attention to these issues in the U.S. and internationally. Her research has focused on measuring, documenting, understanding, and addressing socioeconomic and racial/ethnic disparities, particularly in maternal and infant health and health care. During the 1990s she worked with World Health Organization staff in Geneva to develop and implement a global initiative on equity in health and health care. She recently served as Research Director for a national commission on the social determinants of health in the U.S. supported by the Robert Wood Johnson Foundation. Throughout her career, she has collaborated with local, state, federal, and international health agencies to see rigorous research translated into practice with the goal of achieving greater equity in health. She was elected to the Institute of Medicine of the National Academy of Sciences in 2002.

Tuesday, February 12th

12:00–1:30pm

Amado Recital Hall, Irvine Auditorium

3401 Spruce Street
