HIV Programming and Policy:
Will treatment as prevention overshadow the efforts of behavior change programs?

Myron S. Cohen, MD is the J. Herbert Bate Distinguished Professor of Medicine, Microbiology and Immunology and Epidemiology at the University of North Carolina at Chapel Hill. He also serves as chief of the Division of Infectious Diseases, director of the Institute for Global Health & Infectious Diseases, and Associate Vice Chancellor for Global Health. Additionally, Dr. Cohen is co-principal investigator of the National Institutes of Health HIV Prevention Trials Network (HPTN).

Robert M. Grant, MD, MPH is a Professor of Medicine at the University of California, San Francisco. Dr. Grant has more than 26 years of experience with AIDS clinical care and research, including four years in leading roles in epidemiological studies in both San Francisco and Uganda. He is the protocol chair for the Pre-Exposure Prophylaxis Initiative (iPrEx) clinical trial, a multinational study with 11 research sites in six countries on four continents and the first one to demonstrate the efficacy of pre-exposure prophylaxis (PrEP) in the prevention of HIV infection.

Moderator: Victoria A. Cargill, MD, MSCE teaches in the University of Pennsylvania Robert Wood Johnson Scholars program. At Case Western Reserve University, she developed an AIDS education and prevention intervention program for adolescents and young adults of color known as SAMM – Stopping AIDS Is My Mission.

Friday, November 15th, 12 – 1:30pm
